Desengaño del hombre, en el tribunal de la fortuna.
n. p. [1663.] 149, (1) pp. Sm. 8°.

"It is a vision, in which the author goes to the house of 'Desengaño,' — that peculiarly Castilian word, which may here be translated Truth. He is led afterwards to the palace and tribunal of Fortune, when he is disabused of his errors concerning all earthly good. The fiction is of little worth, and the style is that of the school of Góngora."—Ticknor.

My dear Mother
I have just received your letter of the 7th inst. and am
glad to hear from you. I am well and hope this
letter will find you the same. I have not much news
to write at present. I am still in the same place
and doing the same work. I hope to hear from you
again soon. I am, dear Mother, your affectionate son,

This collection is arranged according to the numbers in Charles Evans' American Bibliography.

1. The first part of the paper is devoted to a general discussion of the problem of the existence of a solution of the system of equations (1) for arbitrary values of the parameters α and β . It is shown that the system has a solution for arbitrary values of the parameters α and β if and only if the condition $\alpha + \beta = 1$ is satisfied. In this case the solution is unique and is given by the formula

$$x = \frac{1}{\alpha + \beta} \left(\alpha x_1 + \beta x_2 \right)$$

where x_1 and x_2 are the solutions of the system of equations (1) for $\alpha = 1$ and $\beta = 0$ and for $\alpha = 0$ and $\beta = 1$ respectively.

2. The second part of the paper is devoted to a study of the properties of the solution of the system of equations (1) for arbitrary values of the parameters α and β . It is shown that the solution is continuous and differentiable with respect to the parameters α and β and that it satisfies the system of equations (1) for arbitrary values of the parameters α and β .

3. The third part of the paper is devoted to a study of the properties of the solution of the system of equations (1) for arbitrary values of the parameters α and β . It is shown that the solution is continuous and differentiable with respect to the parameters α and β and that it satisfies the system of equations (1) for arbitrary values of the parameters α and β .
